i-GO OVERNIGHT VISION CORRECTION at Specs of Kensington

How it works in terms of fitting appointments and what it costs:

At Specs of Kensington we are dedicated to giving you the best eye care possible and that applies to our approach to looking after your eyes if you choose to have Overnight Vision Correction (OVC).

The ongoing cost of wearing Overnight Vision Correction is about the same as wearing the best quality Daily Disposable Contact Lenses.

To start with, you will come in for a consultation to discuss your suitability for OVC. If it's been more than 6 months since your last full eye examination or you don't have an up-to-date written prescription, then we'll need to do an eye examination for you too. The cost of this initial iGo consultation is just £59 (£89 if you need the eye examination as well).

If you prove to be a suitable candidate for OVC and you decide you'd like to go ahead to try lenses out, then you will pay a fee of £259 and we will order your first pair of lenses. The fees you have paid will cover you not only for the initial visit and this first pair of lenses, but also for all appointments within the following 4 weeks. (Teach and issue appointment, next morning follow-up, 1 week follow-up and 1 month follow-up, plus any extra appointments that might be needed within this time.)

That's it – no long term commitments until you see if OVC is right for you – peace of mind that your suitability for OVC is well established before you proceed to use OVC as your longer term vision correction of choice.

If, after the first month, you wish to carry on wearing OVC, you will put in place a DD for £59.00 per month (if lenses are to be replaced on a 6 monthly basis) or £50 per month (if lenses are to be replaced annually). This monthly payment covers you for all your ongoing contact lens check-ups as an OVC wearer, both routine and unscheduled, as well as routine eye examinations, as needed, as well as all your contact lens care products. The only extra cost you might incur would be if you need any extra lenses because of loss or breakage.

Call us today to book an appointment for your initial evaluation. You'll need at least an hour for this and if you need an eye examination as well please allow an hour and a half.

We look forward to seeing you.

Elaine Styles & Daska Barnett – *your OVC accredited Contact Lens Practitioners.*
